About

Figma

Figma is a cloud-based design and collaboration tool that is widely used for creating user interfaces, graphic designs, prototypes, and presentations. It allows users to create visually appealing presentation slides using a simple drag-and-drop interface and a variety of design tools.

One of Figma's biggest advantages is its real-time collaboration feature, which enables multiple users to work on the same project simultaneously. This makes it an excellent tool for group activities, school projects, and professional presentations.

Figma provides customizable templates, fonts, icons, images, and design elements that help users create modern and engaging presentations. Since it is web-based, presentations can be accessed and edited from different devices with an internet connection.

Advantages and Disadvantages

Work Together Live

Multiple team members can work, comment, and present in the exact same canvas simultaneously from any browser on macOS, Windows, or Linux.

Works Anywhere

It runs inside any web browser, so it works on Mac, Windows, and Chromebooks without needing special software.

Easy to Share

You can send a web link to anyone so they can test your app design or leave comments for free.

Needs Internet

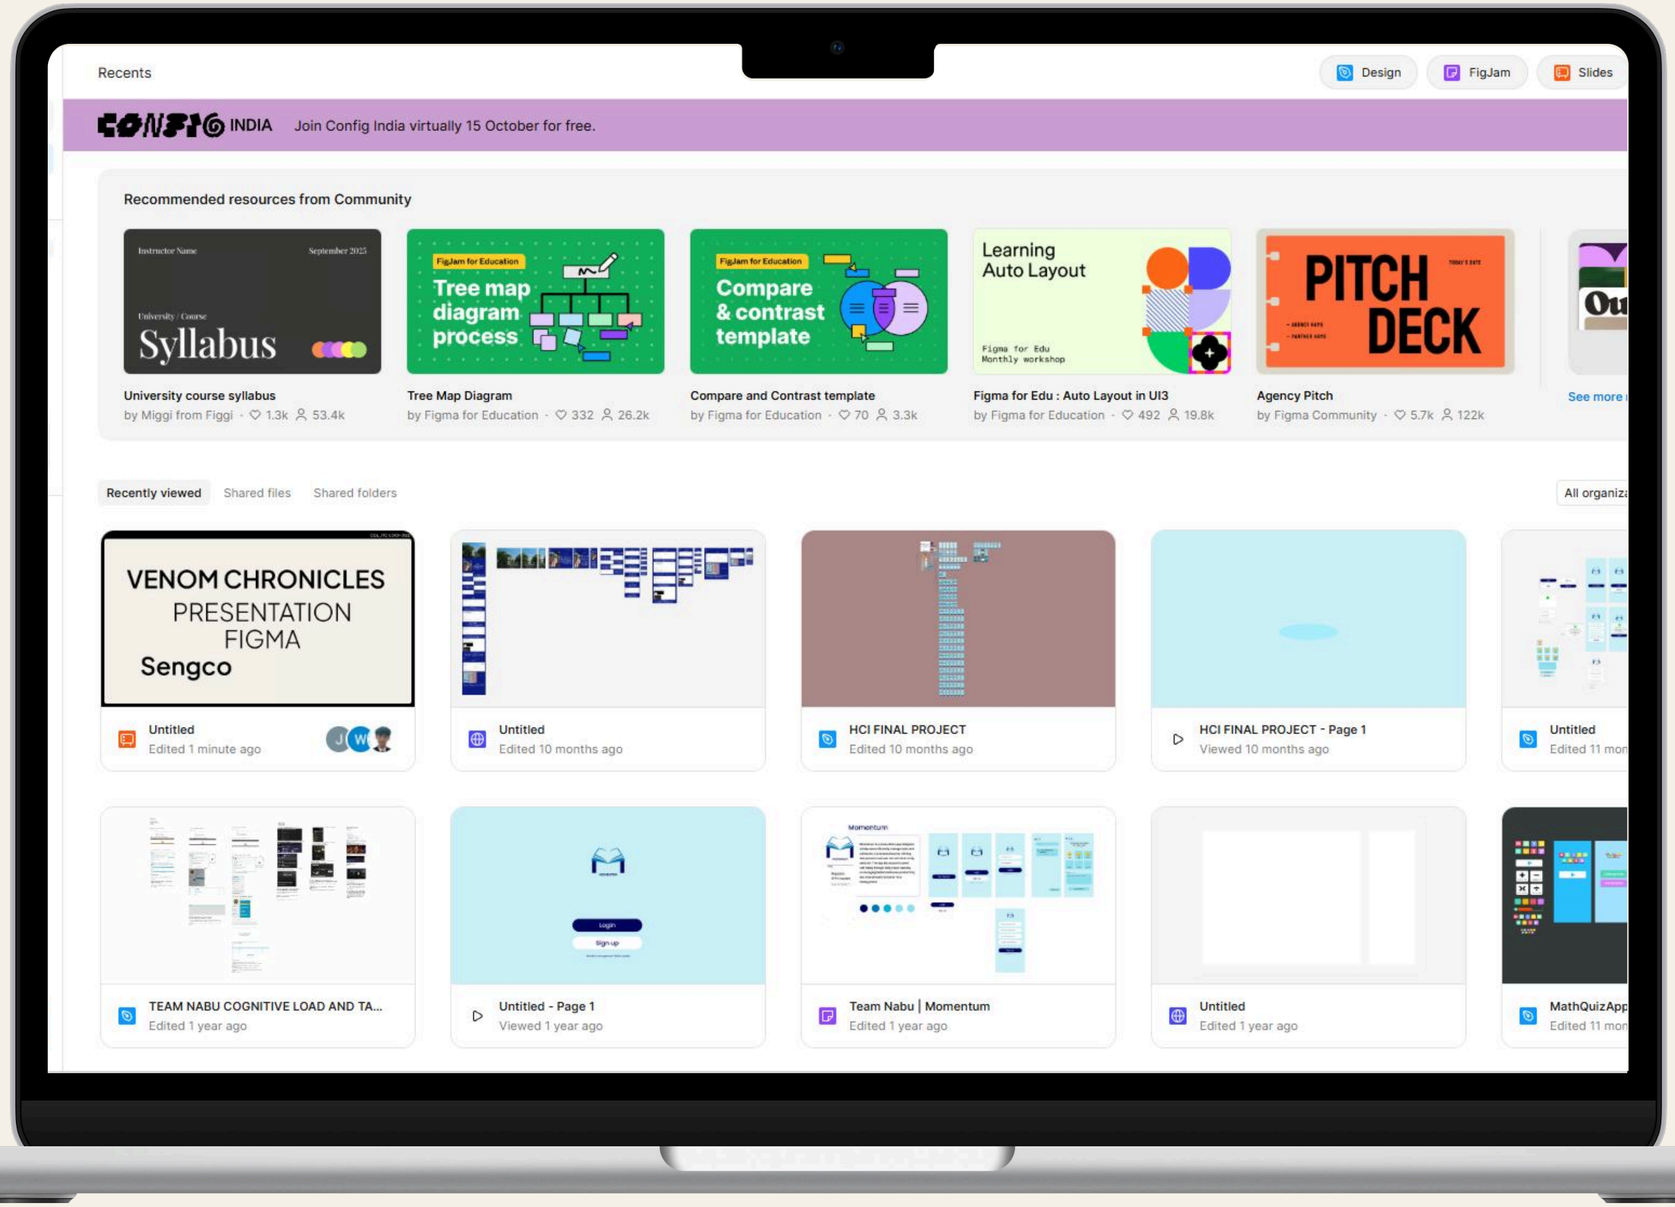

You must be online to use most of its features and save your work properly.

Gets Slow

If your design file gets too big with thousands of pictures and shapes, it can freeze or slow down your computer.

Hard to Learn at First

While the simple tools are easy, learning the advanced features takes a lot of time and practice

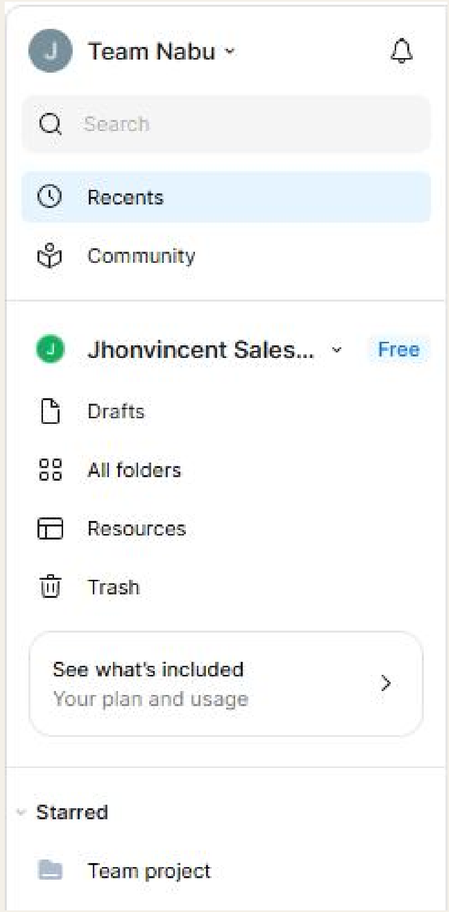

Here's our Parts and Label with Function

FIGMA DASHBOARD

The Figma File Browser (also called the Home Screen or Dashboard) serves as the central hub for managing your workspace, files, and account settings before opening an active design project.

LEFT NAVIGATION BAR

Displays your profile/account name, Search, Recents, Community, Drafts, Teams, and Trash.

ACCOUNT / TEAM SELECTOR

Displays your profile/account name, Search, Recents, Community, Drafts, Teams, and Trash.

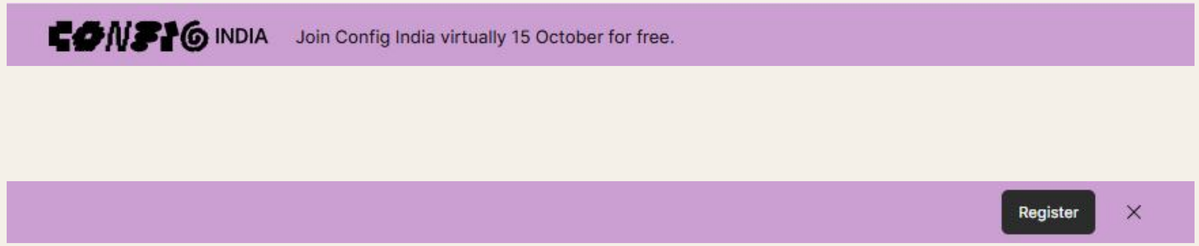

SEARCH BAR & NOTIFICATION

Allows you to search across all your files and view project notifications.

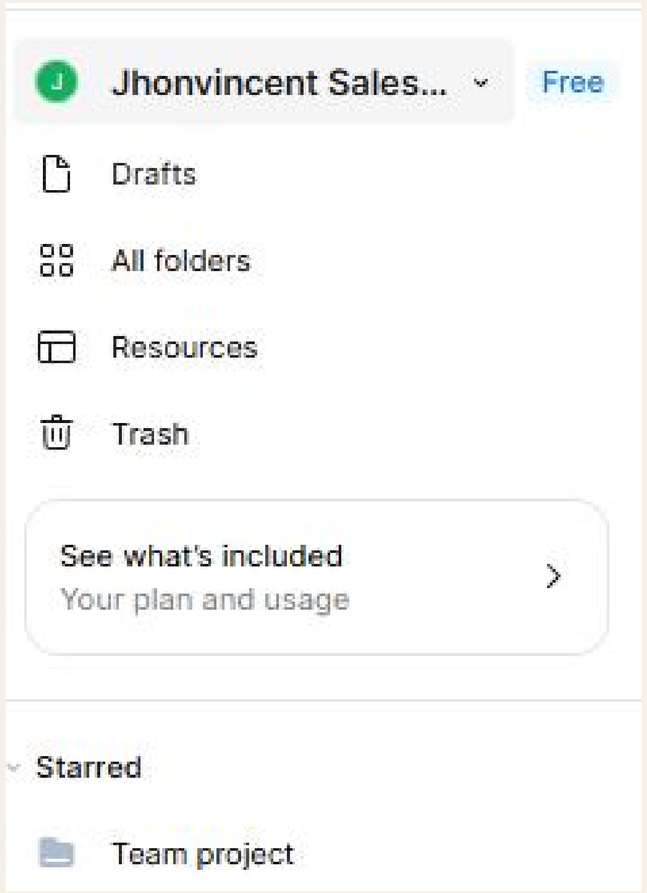

TOP HEADER / ANNOUNCEMENT HEADER

Displays news, promotional banners, updates, or events from Figma.

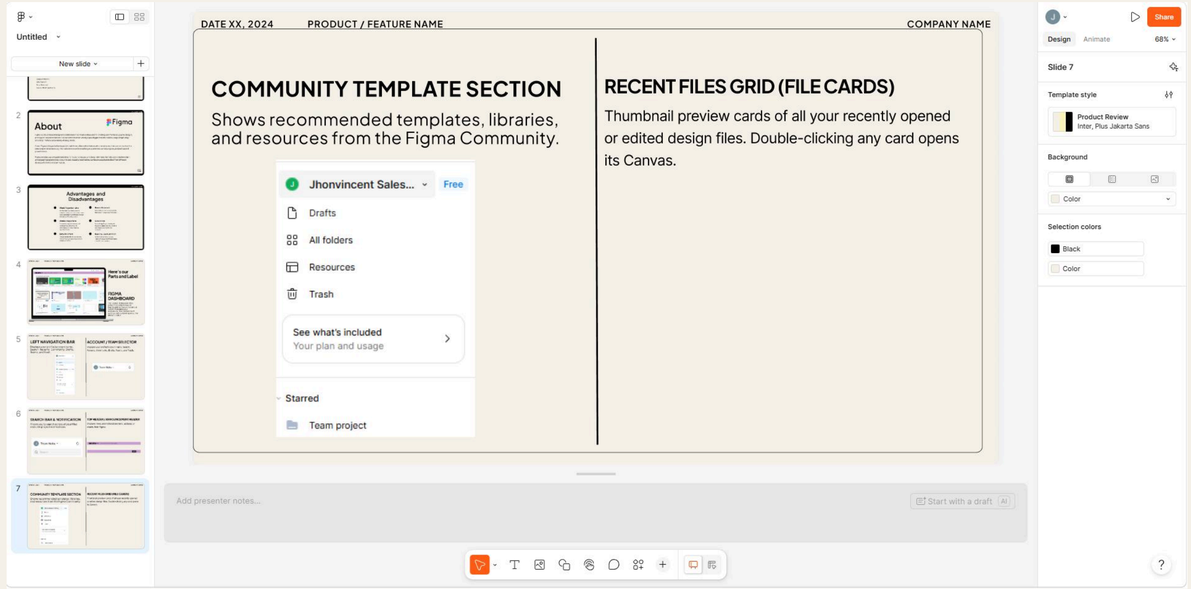

COMMUNITY TEMPLATE SECTION

Shows recommended templates, libraries, and resources from the Figma Community.

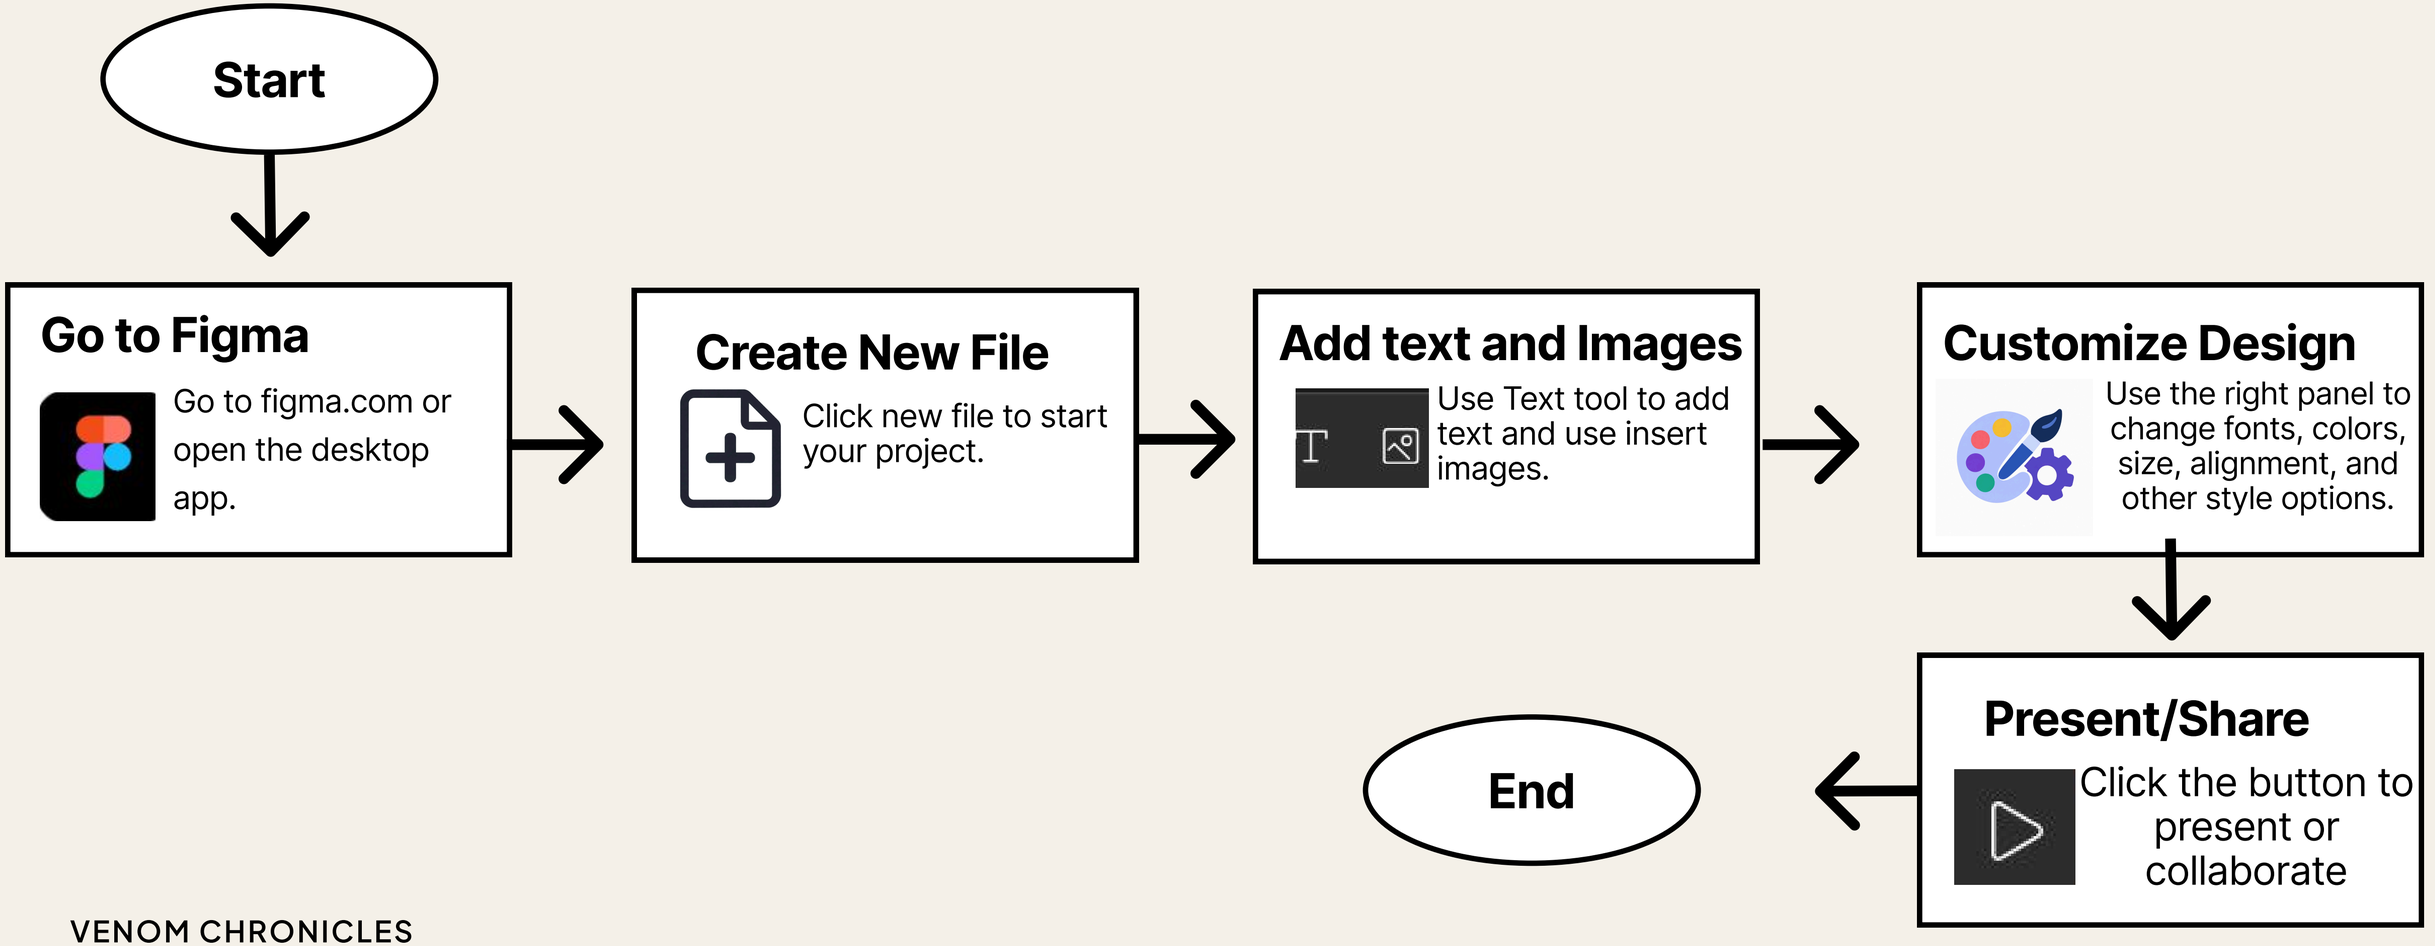

RECENT FILES GRID (FILE CARDS)

Thumbnail preview cards of all your recently opened or edited design files. Double-clicking any card opens its Canvas.

How to use Figma

Step-by-step process for creating, editing, and presenting slides in Figma.

Thank you!
