SYSTEM DESCRIPTION

I. SYSTEM NAME

Alumni Management System

II. SYSTEM PURPOSE

The Alumni Management System serves as an interactive portal designed to connect graduates with their alma mater and former classmates. It streamlines alumni record management, promotes professional networking, and simplifies event management while offering job opportunities, mentorship programs, and engagement incentives for registered members.

III. PROBLEM STATEMENT

Many universities struggle to maintain accurate contact information for their graduates, leading to weak alumni relations and missed networking opportunities. Existing manual processes make it difficult to organize alumni events, distribute job opportunities, track career outcomes, and encourage long-term participation or donations from former students.

IV. TARGET USERS

- **Alumni / Graduates:** Former students who want to build professional connections, search for career opportunities, register for university events, and track earned rewards.

- **Alumni Affairs Administrators:** University staff in charge of updating database records, verifying member profiles, organizing events, posting career listings, and sending out updates.
- **University Management:** School leaders who review institutional reports, track alumni career progress, and oversee fundraising or alumni engagement initiatives.

V. MAJOR FEATURES

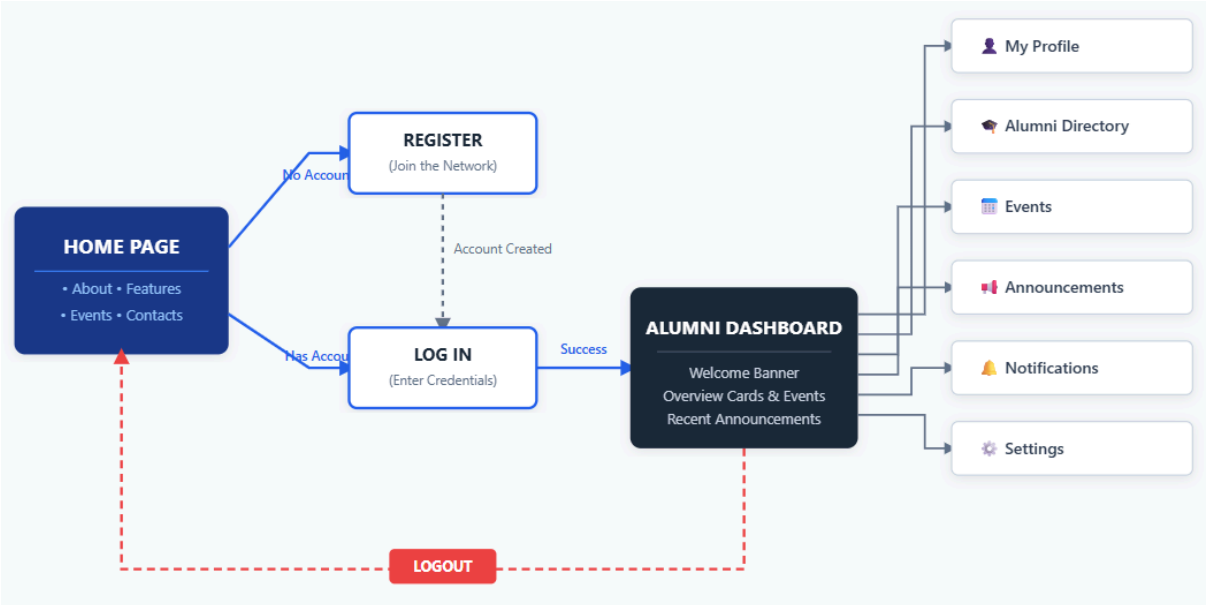

- **Searchable Graduate Directory:** Easily locate and filter classmates using criteria like graduation year, program, job title, or physical location.
- **Career Opportunities Portal:** Allows alumni and admins to share job openings, manage applications, and apply to roles with a single click.
- **Event Planning & Digital Ticketing:** Simplifies RSVPing for school reunions, webinars, and homecoming events while providing downloadable event passes.
- **Professional Mentorship Network**: Bridges the gap between recent graduates and seasoned alumni for career coaching and industry advice.
- **Incentive & Rewards Tracker:** Rewards member participation by awarding points (PTS) for event attendance, profile updates, and active engagement.
- **Verified Member Profiles:** Personal profiles showcasing academic history, career milestones, and connected LinkedIn profiles.

- **Real-Time System Alerts:** Delivers instant notifications for campus news, job application updates, and scheduled events.

VI. EXPECTED BENEFITS

- **Accelerated Career Mobility:** Connects alumni directly to hiring opportunities and professional networks.
- **Streamlined Event Management:** Enhances attendee tracking and boosts participation in institutional activities.
- **Sustained Alumni Involvement:** Keeps graduates actively involved with their alma mater through rewards, news, and collaboration.

USER FLOW DIAGRAM

User Flow Diagram

The system flow starts on the public Home Page, where visitors can freely view sections like About, Features, Events, and Contacts. To access the portal, new users must register an account first, while existing users can sign in immediately with their credentials on the Log In page. Successful login opens the main Alumni Dashboard, where members can navigate to My Profile, Alumni Directory, Events, Announcements, Notifications, and Settings. Lastly, clicking Logout ends the session and returns the user to the Home Page.
