Prelim Laboratory Activity

Creating a Slide Master in PowerPoint

Objectives

- Create and customize a Slide Master.
- Apply consistent fonts, colors, and layouts.
- Create and modify custom slide layouts.
- Apply the Slide Master to multiple slides. Produce a professional PowerPoint presentation.

What is a Slide Master?

- A Slide Master controls the overall design and formatting of a PowerPoint presentation.
- It helps keep the fonts, colors, backgrounds, and layouts consistent across slides.

Slide Master Features

- **Theme** – controls the overall design.
- **Fonts** – keeps text styles consistent.
- **Background** – provides a consistent visual style.
- **Footer** – displays information such as name and course.
- **Slide Number** – helps organize the presentation.

Custom Slide Layout

- A custom slide layout is a user-defined template that establishes the structural arrangement of text, images, media, and other objects on a presentation slide.

Applying the Slide Master

The Slide Master helps keep the presentation consistent by applying the same fonts, colors, background, footer, and slide numbering across the slides.
